

DRY ANTI-RUST TAPE

Made in Japan

Revolutionary anti-rust products is developed. This is like a sticky note. This tape size is 2cm x 6cm. It was developed for plastic mold. The special gas, which safety and heavier than air, will come out from tape and will stop once the space is fully filled with the gas. You just put this tape to core side(moving side) of mold after cleaning, and close the mold. Only doing this, inside of mold will not rust.

You can use other applications just putting this tape and seal using like "sealing bag." One tape will protect 0.3L - 0.5L of volume space.

-Application for Plastic mold

Recently, demands for quality of products and mold is getting more severe and severe, and need to cleaning anti-rust agent, waste of first several shot, or some trouble caused by anti-rust.

DRY ANTI-RUST TAPE have a lot of possibility for solution of these demands and will provide a lot of merit.

Work under Dew formation

<How to use>

1. After finishing production, clean mold and put appropriate pieces of DRY ANTI-RUST TAPE to core side.
2. Close the mold immediately and finish.

<Trial report>

■ 850t class of closing : put 6-8 pcs

■ 650t class of closing : put 4-6 pcs

※RESULT: After 10 days of holidays, there is NO rust. No cleaning before production, No waste of shot, and No defect of production.

※There is no standard of numbers of tapes because the number will change by the mold shape, temperature, moisture, etc. Need testing by user.

-Application for metal parts

Work on any kinds of metals

Clean metal parts and dry. Put the tape to metal or inside of plastic bag and seal.

※Need trial how many pieces to use and where to put.

-Specifications

Size: 2cm x 6cm/pc x 20pcs/sheet x 10sheets/bag x 150sheets/box
