

Grease Filling Machine

Made in Japan

for Bellows Type Container with Drum Pump

TM-450M is specialized for filling grease to bellows type container. Regular grease filling machine cause a lot of air void due to its shape when you try to fill for bellows container. It means you sometimes fill "Air" instead of grease. It may cause less lubricant trouble on the machine.

TM-450M enable to fill grease into bellows container without air void.

Semi-automatic computer programmed machine can be used for any shapes and size of bellows, and each viscosity.

Specially designed Drum Pump comes with.

- **Adjustable volume and speed.**
- **Electrical main power source.**
- **Very few air consumption.**
- **Can be customized for your demands.**

Model Number	TM-450M
Filling Machine Size (mm)	W1300 x D800 x H1610
Pump Assy Size (mm)	W700 x D855 x H2180
Filling Speed	450ml/pc = 7 sec

Special customise, Overseas Instruction and Installation Available !
